A highly motivated and detail-oriented software developer seeking a position to utilize self-taught skills and strong work ethic to make a positive impact while continuously learning and growing in the field.

## EXPERIENCE

Freelance Software Development | Bishop, CA **Freelance**

*July 2020 – Present*

Highly skilled and self-taught software developer with expertise in TypeScript. Proven experience in delivering multiple successful personal projects including:

- Developed and deployed Discord bots using NodeJS and DiscordJS for various discord communities.
- Designed and implemented a variety of front-end web applications using TypeScript and React including:
  - A user-friendly dashboard offering movie reviews, jokes, book reviews, and weather information.
  - A Discord Wikipedia website providing an in-depth preview of Discord communities.
  - Completed an Open AI technology-based front-end developer intern challenge provided by Shopify.
- Demonstrated ability to provide code review and mentorship to enhance code quality, maintain best practices, and improve readability and cohesion.
- Hands-on experience in hosting projects for production using platforms such as Heroku and Railway.
- Skilled in full-stack development with a strong focus on both front-end and back-end development.

Inyo County Juvenile Probation | Bishop, CA **Rehabilitation Specialist**

*March 2019 – February 2023*

*Worked alongside a team to provide services to the youth of Inyo County.*

- Played a key role in streamlining department processes, such as transportation to court and juvenile halls, strengthening relationships with school district administration and establishing partnerships with other agencies through effective communication and collaboration.
- Led successful intervention programs for youth, to help them achieve their goals.
- Facilitated team-oriented programs, fostering a collaborative and supportive environment.

Vestas Blades Of America | Windsor, CO **Production Specialist**

*March 2017 – March 2018*

- Working collaboratively with other team members to manufacture wind turbine blades made of fiberglass. This involved following detailed documentation and streamlined build processes to ensure that each blade was constructed to precise specifications.
- Follow precise documentation and streamlined build processes was a critical aspect of the job, as even a small mistake in the manufacturing process could potentially ruin an entire blade.
